

**Amendments to the Specification (Second Substitute Specification):**

Please replace the paragraph commencing on page 7, line 18, and continuing to page 8, line 2, with the following amended paragraph: --Figure 5 is similar to Figure 2 but includes components that, although described herein, are not otherwise in the drawings. Such components are depicted diagrammatically. In Figure 5, propelling unit 2 comprises caterpillar tracks 4'. In combination with a scraper or manure slide 3, a brush 3' may be provided which, in Figure 5, also represents a spraying unit. Although the manure displacement means may comprise at least one manure slide 3 or one brush 3' or one spraying unit 3' or a combination thereof, as set forth above, the major amount of weight of the vehicle always bears on the manure displacement means, whatever its form, by the appropriate utilization of structural means therefor well within the skill of the art.--
